The Parts of a Flower

Flower dissection

Dissect flowers to identify all their important parts

Use the diagrams below to identify the parts of your real flower. Draw and label the parts that you can identify on your flower sample.

/ Stamen / Accepts pollen into the Pistol

ANTHER *Makes the pollen*

Filament *Supports the Anther*

PISTIL Takes pollen into

the flower to form seeds

Sepals

PETALS -

Attracts Insects

Ovuals Baby Seeds Immature Fruit -Holds and makes developing Seeds

Ovary

Thinking and discussion:

Name:

A plant needs pollinators to grow it's seeds and fruit. Can you see how your flowers are pollenated? What features do your flowers have to attract insects?
